that excites

Nissan introduces the ultimate icon of Intelligent Mobility: your father

NISSAN INTELLIGENT MOBILITY

Intelligent Around-View Camera

Provides a virtual 360-degree scene of the car in bird's-eye view, so the driver can check for obstructions around the vehicle.

Paternal advice

Fathers are always foreseeing things that protect their families. They are always showing things from a new angle, with a new perspective.

Zero Gravity Technology

NASA-inspired technology alleviates fatigue when driving, pursuing the ideal posture to make long drives more pleasant, always maintaining seating comfort.

A father's lap

Few things are more comfortable than a father's lap; it can cure anything – even a child's cry.

Intelligent Chassis Control¹

Improves driver confidence when driving through a turn, over uneven surfaces, or when braking, keeping the vehicle always on track.

The hands that guide

When a baby is taking their first steps, the hands of a father helps to improve confidence and increase balance on their two feet.

Intelligent Forward Collision Warning

If the system detects potential risks, it gives an alert to encourage the driver to decelerate in advance, with a signal on the display and an audible warning.

The eyes of a father

An attentive father anticipates risks and gives advice to dangerous situations.

Intelligent Brake Assist

If there is no reaction from the driver, the system decelerates gradually the car to help avoiding or reducing the impact of a collision.

Father's arms

If warnings are not enough, the father's arms are there to hold the family, for their wellbeing.

2-Tone Paint

Groundbreaking paint-finish combinations consisted of four body colors paired with a contrasting roof.

Understanding

Being a father means understanding and supporting all kinds of diversity.

¹. Operates in conjunction with Intelligent trace control, Intelligent engine brake and Intelligent ride control systems.
